

## 2017 David Crighton Award Citation

### LMS-IMA David Crighton Medal – Professor I. David Abrahams.

The IMA and the LMS have awarded the 2017 David Crighton Medal to Professor I. David Abrahams, Director of the Isaac Newton Institute for the Mathematical Sciences, for his outstanding service to both mathematics and the mathematical community.

Abrahams has developed the technically demanding Wiener-Hopf techniques for applications in real problems, and created a vibrant group working on waves in fibre optics. He has received the Royal Society's Leverhulme Trust Senior Research Fellowship and its Wolfson Research Merit Award, a strong indication of the value people close to his area put on his work.

In terms of service to the community, David has performed almost all the important roles of a leader in the mathematics community: he has sat on and chaired committees for the Research Councils including the SAT, served on the REF panel twice, and taken senior leadership roles as President of the IMA, Scientific Director at ICMS and more recently Director of the Isaac Newton Institute for the Mathematical Sciences. In all these positions he has supported both the mathematical sciences (in the broadest sense) and mathematical scientists, as well as being an
