

## Citation for Emmanuel Breuillard (Fröhlich Prize)

### Short citation

his landmark work on groups and their actions, masterly combining in ingenious ways algebraic groups, combinatorics, number theory, Diophantine approximation, topology and algebras. His work is notable for its originality, conceptual clarity, elegance and depth.

### Long citation

his landmark work on groups and their actions, masterly combining in ingenious ways algebraic groups, combinatorics, number theory, Diophantine approximation, topology and algebras. Breuillard has been able to shine light on many problems in a surprisingly broad set of directions. His work is notable for its originality, conceptual clarity, elegance and depth.
